In item 1 in the section entitled "Claim Rejections - 35 USC § 112" on page 2 of the outstanding Office Action, the Examiner rejects currently pending Claims 2 and 5 for allegedly being indefinite because currently pending Claim 2 is allegedly inconsistent with currently pending Claim 1. The Applicants respectfully traverse this rejection because currently pending Claims 2 and 5 are believed to be clear to someone with ordinary skill in the art. Furthermore, this indefiniteness rejection is now moot and should be withdrawn because amended Claim 2 is not inconsistent with amended Claim 1.

In items 1-2 in the section entitled "Claim Rejections - 35 USC § 102" on page 2 of the outstanding Office Action, the Examiner rejects currently pending Claims 1, 4, 7, and 19 for allegedly being anticipated by two newly cited abstracts--CA 125: 41250, 1996 and CA 129: 44683, 1998 (hereinafter referred to as the "1996 abstract" and the "1998 abstract," respectively). The Applicants respectfully traverse this rejection because the 1996 abstract and the 1998 abstract do not teach or suggest the claimed invention (i.e., the invention claimed in amended Claims 1 and 2, currently pending Claims 3-18 and 20-38, and new Claims 39-79).

In item 3 on page 3 of the outstanding Office Action, the Examiner indicates that currently pending Claims 3, 6, and 8 contain allowable subject matter; and in item 4 on page 3 of the outstanding Office Action, the Examiner indicates that currently pending Claims 9-18 and 20-38 are allowed. Therefore, in view of the foregoing, favorable reconsideration of the application is respectfully requested. It is submitted that the claims of record are in condition for allowance. Allowance of the claims at an early date is solicited.

This response amends currently pending Claims 1 and 2, adds new Claims 39-79, and cancels currently pending Claim 19. The amend-

ments, additions, and cancellations that are described in the preceding sentence were done to more fully claim the Applicants' invention and were not necessarily done to overcome the prior art, to overcome rejections under 35 U.S.C. § 112, or to overcome any other rejections or objections. The amendments, additions, and cancellations that are described in the first sentence of this paragraph shall not be considered necessary to overcome the prior art, shall not be considered necessary to overcome rejections under 35 U.S.C. § 112, and shall not be considered necessary to overcome any other rejections or objections.

The Applicants reserve the right to seek protection for any unclaimed subject matter either subsequently in the prosecution of the present case or in a divisional or continuation application.

The Commissioner is authorized to charge any additional fees which may be required or credit overpayment to Deposit Account No. 12-0415; and, in particular, if this response is not timely filed, then the Commissioner is authorized to treat this Response as including a petition to extend the time period pursuant to 37 C.F.R 1.136(a) requesting an extension of time of the number of months necessary to make this response timely filed and the petition fee due in connection therewith may be charged to deposit account No. 12-0415.
